Suddenly a seal is transformed into either a common or a grey seal, a fin seen in the distance becomes a porpoise, a white sided dolphin or a minke whale. I would also suggest this book to any diver or snorkeller as it is really helpful for the animals we encounter on a regular basis. Nicely written, excellent illustrations and a good book.

They feed largely on fish and marine invertebrates; but a few, like the killer whale, feed on large mammals and birds, such as penguins and seals. Some baleen whales (mainly gray whales and right whales) are specialised for feeding on benthic creatures.

Cetacea - Wikipedia

Whales and dolphins have large brains; while sperm whales have the largest brain, dolphins have a brain to body ratio second only to humans. Large-brained creatures generally have a few things in common: they live long lives; they are sociable; their behaviour is complicated; females give birth to only a few offspring throughout their lives and take extraordinary care of each baby while ...
